

Phalanx™

Are you aware of these facts about teenagers using the Internet today?

- 71% of teens reported receiving messages from a stranger on the Internet!
- 45% said that a stranger asked them for personal information!
- 40% reported that they'll usually reply and chat with a stranger!
- 14% have actually met with a stranger they encountered online!

What are YOU doing to protect your children from the Internet ?

If you are not monitoring their activity you could be putting them at risk to child pornographers, obscene content & even predators!

Help is now available through an innovative security system called the Phalanx™.

IT'S TIME YOU TAKE ACTION TO PROTECT YOUR CHILDREN ON THE INTERNET !

Phalanx™ is a simple to install device, which you use at home. It includes a **Monitoring & Alert Service** which work together continuously looking for Objectionable Content & Predators by dynamically analyzing and filtering Internet websites, as well as, Instant Messages (IM) from chat rooms on social networks like MySpace™, Friendster™ and Xanga™. Peer-to-Peer file sharing sites such as Kazaa™, LimeWire™, and BearShare™ that connect your computer to child pornographers and your children to predators can be blocked with our easy to use firewall.

The **Monitoring & Alert Service** carefully analyzes every word and phrase while comparing them to known words and phrases used by Predators. If suspicious or **Predatory** communication is detected, an Alert is sent to you advising of the risk.

Phalanx™ blocks *Objectionable Content* **BEFORE** your children ever see it!

Other types of threats are also blocked before they ever get to your computer. User reports are available to Parents providing detailed information on their children's use empowering them to make better assessments of the Internet & the social networking threat.

At eCenturion we are also parents with world class experience in **Internet Technology, Law Enforcement, School Resource Officer (SRO), Information Security for Banking & the Olympics**. With the Phalanx™ we have created a unique and innovative patent pending product to help you protect your family and children against Internet crime, Identity Theft, pornography, and objectionable content.

Phalanx™ is a simple to install device that easily connects between your high-speed modem and your home computers. All your Internet use at home can be protected with a single device. All Windows®, Vista®, Mac and Unix operating systems are supported.

Key Monitoring Service Features:

- Parental Controls through content filtering along with essential security services for home networks.
- Real-time analysis, filtering and **BLOCKING** of objectionable Web pages (pornographic, violent or illegal sites)
- Continuous filtering of both sides of Instant Messaging (IM) communications capable of detecting **Predators**!
- Instant Parental Alerts for suspected **Predator** activity by email, or TXT messaging.
- In depth analytical search for Internet Predator behavior
